- 2 Standing with a Xbox or motion controller in third person
- 3 Seated with a Xbox or motion controller in first person
- 4 Standing with a Xbox or motion controller in first person (oh lordy!)

This DLC is pretty unique, nobody has ever tried making fancy uniforms for units that fly\ride planes, this DLC is pretty unique in my opinion.. This game is horrible. Not worth the 5 dollars. This was a waste of time, It was cryptic for the sake of it.

Honestly was so excited by some of the humour until 10 min later the game was over.

Pros:

Cheap

Fast paced

Regularly updated

Indie :D

Few bugs

Good fun

Single player bots

Controller support

Cons:

The game is only really worth it if other people have it

Few options/settings

Just get it.. Gameplay: The storyline is non-existent, which isn't the worst thing in the world. Unfortunately, however, there are no redeeming qualities to make up for this. There are a decent amount of game mechanics and levels to keep the total playtime up to 6 hours. The levels however are in no way challenging.

Visuals: It's pretty disappointing. It looks very unfinished.

Audio: It's not the worst audiowise. I can say that the sound effects match the disproportionate cartoon-like theme that they were aiming for. The soundtrack would get repetitive as the amount of songs they had didn't match the playtime it took to beat the game.

Replayability*: There is none. I have no desire to go back and play the game. All the levels are the exact same and often times the "perfection" mechanics (collecting all of the X) can usually be done on the first run through.

*This varies A LOT from person to person, so only rely on this category from me if you've agreed with my other reviews' replayability sections.. I really love this game and it has a lot of re-play value. For \$5 it's really incredible. The art style and animations are simple but brilliant and the music suits the setting perfectly. Really amazing.. I dare you to mark diagonally ^^.
fun open world game.. I'm a fan of this company's Hidden Object/Adventure Games. I often found myself wondering what it would be like if they just buckled down and made a straight Adventure Game, unburdened by the need to shoe-horn in seemingly-pointless HOP elements. Now I know. I wish I didn't.

This game is a mess. Poorly translated, plodding & often nonsensical, with a wet thud of a finale, "Parallels Cross" feels like a HOP/Adventure game that was half-finished and rushed out the door to meet an artificial deadline...only to have Dave the intern forget to unlock all the HOP elements. It's dull, the pacing makes no sense ("My son is missing! I know where he is! So let me just spend potentially HOURS solving this out-of-the-blue number sequence puzzle I have no reason to believe is in any way related to his mysterious disappearance rather than smashing in the window and chasing after my missing son!"), the puzzles are EXTREMELY tedious, and for the first time EVER in any of their games I found myself skipping puzzles just to get through the dang thing. Don't bother with this one. It's a dud, plain and simple. Clearly they have no clue how to make a straight adventure game. Let's hope they stick with the hybrid games from here on out.. GG with friends but pretty boring alone.
